I thank those people who introduced me to the leather sector which I, right from the beginning, have always considered the most beautiful and stimulating job a person could ever wish for.

Palmerino Bortoli (founder)

# ABOUT US

Since the 1979 we are specialized in the manufacturing European Cow Hides, for Upholstery, Footwear and Leathergoods purposes.

We are located in Zermeghedo, the neighbours of Arzignano (VI – ITALY), with a production facility of around 6.000 sq.mq. We use to process European raw hides, taking care completely about the whole process:

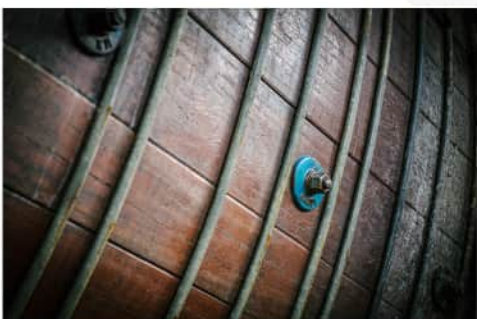

- Beam House: Liming, De-liming, Tanning.
- Wet End: Re-tanning and Dyeing.
- Finishing: Full grain and/or slightly buffed, natural grain and/or embossed.

All above is carried out through very much consolidated production recipes and chemical processes, in order to get the best naturally finished leather.

“Conceria Jolly S.p.a.” is part of a Group of Companies, sisters concern of “Conceria Tris S.p.a.”, world wide renowned and distinguished for its Hair-On articles, both on cow and horse hides, the so called “Art. Cavallino”.

We use to create all our articles with a classic and refined touch, for a sporty and modern look. Our challenge is to meet the different requirements coming from our customers all over the world. We are proud to be an Eco-Friendly Tannery. We process our leather through the most advanced Chemical Procedures and Technologies. Our target is the Creation of Innovation, to be proposed to all our customers all over the world.

# SUSTAINABILITY

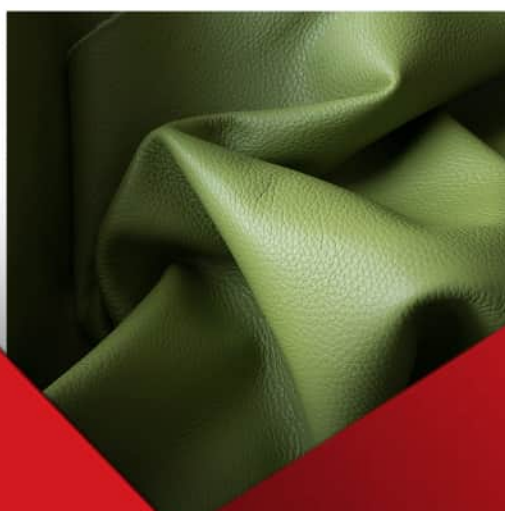

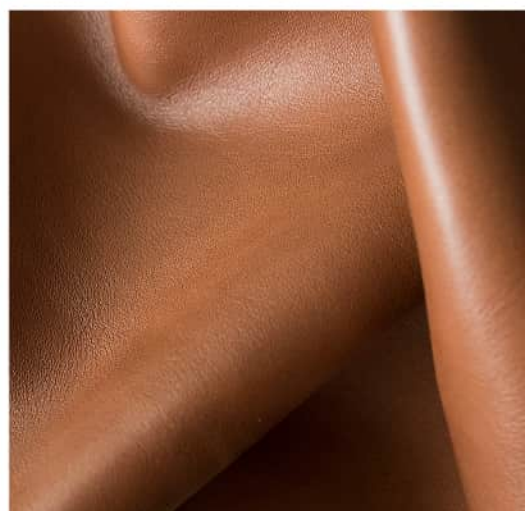

We have always been committed to respecting the environment, choosing performance technologies and guaranteeing safe processes for people. Choosing to change, to reduce waste to produce more sustainable, does not want to be yet another catchy slogan.

With the aim of reducing the environmental footprint, the sum of all the companies involved in the creation of a finished product; we have always given the maximum value to relationships with our suppliers, collaborators and customers. Conscious, that for how much we can engage in the research and development of innovative solutions, in creating articles eco-friendly, leather will always be the intermediate product of a long working chain.

As a company, let's not forget that our goal is to provide the best product possible; without burdening it with unnecessary costs. And, the virtuosity of sustainability, allows us to save money, making everyone gain! We learn to recognize the value of local resources and services, adding technological innovation to the tanning tradition, in a market that is always changing like the global; obtaining the formula of success that binds MADE IN ITALY to GREEN ECONOMY for years.
