ARPEGGIO

Principioattivo / 2024

The ARPEGGIO sofa system is the contemporary interpretation of harmony and perfect modularity designed for Diemme by PRINCIPIOATTIVO Architecture Group. Ideally suited to the present time, comfortable and with great freedom of modularity. The modules allow you to generate a variety of configurations through the linking system and various accessories. The clean lines and geometric shapes of the modules create a spacious platform for sitting or lounging around. ARPEGGIO becomes an object that can be shaped according to desires and needs, an ode to relaxation, a portal for reading, a place for chatting and hushed intimacy, a nest for restful sleep, a timeless office.

Tubular. Connected. Indipendent.

Depending on your needs, a bayonet fixing system allows you build up the basic ARPEGGIO modules with padded and upholstered backrests and 30° tilting armrests. A pouf extends the family and can be attached to the sofa frame or used alone. Another way of connecting the modules is by inserting a table in sheet steel. The family is completed by optional features that are fitted to the ends of the frames: a round compact laminate table and USB sockets.

Harmonious modularity

ARPEGGIO is a modular system conceived to be a great game of free forms, combined according to your taste to throw up an original solution every time, suitable for residential, office or large contract spaces. A sleek profile formed of comfortable single cushions, supported by an instantly recognisable metal base, available in the 3 colours of the collection. A game of colour and material combinations, with the possibility of combining components in different colours, fabrics and textures. ARPEGGIO makes versatility its distinctive feature, adding a touch of freshness and contemporaneity to any environment.

Work, interact, read and relax

Just like in music, you need to find the right harmony, the perfect blend, for a soft and pleasant result overall; in this way the seat becomes a piece that can be shaped as desired and according to needs, and which contains infinite custom possibilities, either to merge discreetly in, or stand out boldly from, the space where it is placed. ARPEGGIO allows you to create various seating arrangements with breaks and features, a seating landscape with an almost graphic character that expresses lightness and versatility.

Each seat is a chapter in our history, a silent embrace that listens and welcomes, a refuge where life takes shape and is coloured with emotions.

Modular sofa

Modular sofa composed of a steel tube frame, with fire-retardant foam seats. The basic module is the main element where, depending on needs, and through bayonet fittings, padded and upholstered backrests, as well as 30° tilting armrests can be added. Extending the family, the pouf is available; it can be attached to the sofa frame or be used on its own. Another accessory is a sheet metal table that connects the modules. The accessory family is completed by optional features that are fitted to the ends of the frames: a round black compact laminate table and USB sockets.
