Fiesta

FLEXIBILITY

The elegant, yet energising fiesta is health-focused with an ergonomic design, visually simplified to create a flexible and more colorful chair. It is perfect for open office landscapes and full of energy workplace environment.

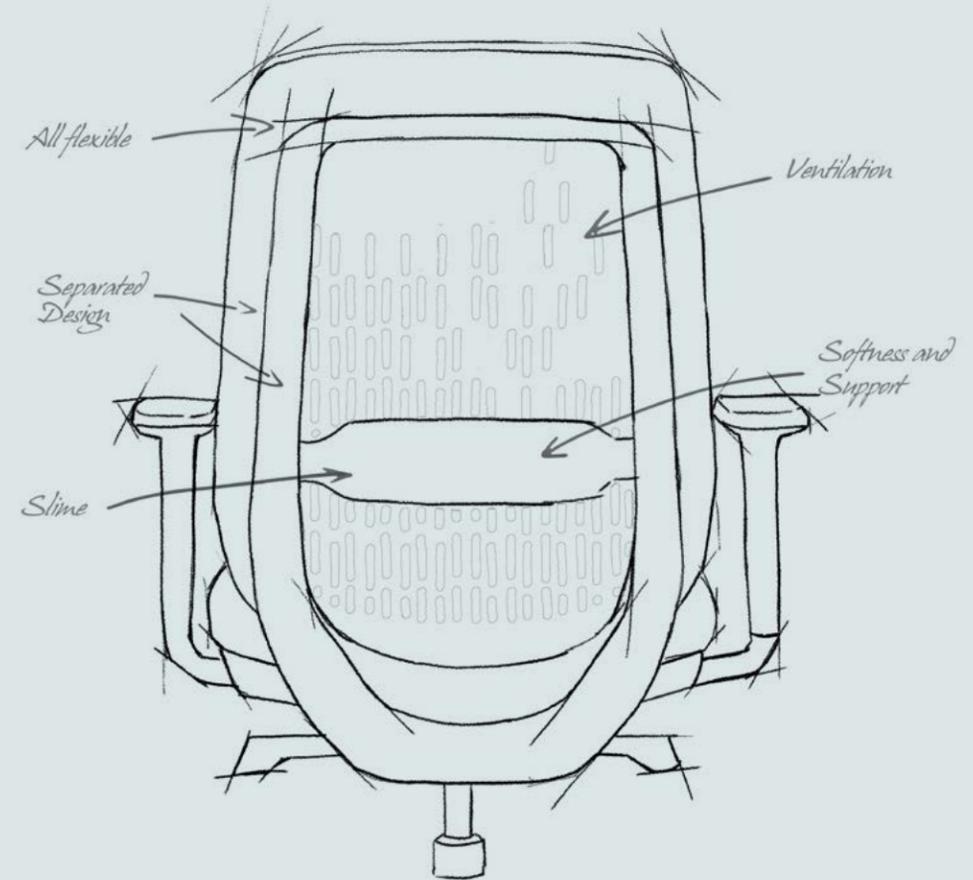

Flexibility and Ventilation, just like the very best ideas.

Flexibility– Simply move freely.

'All flexible edge back' design concept is firstly introduced on Fiesta, by adopting particular plastic and special design, the Fiesta chair back is all flexible. No matter how you lean on the chair back, it is always soft and it offers great comfort that most mesh back chair could not reach as the mesh back is hard.

Ventilation-Extra comfort.

Different to traditional plastic shell back, Fiesta's back is ventilated which helps the dropping down the heat generates after long time leaning on chair back. The simple pattern that carved out is also.

Flexible back top , Middle area, Side edges.

Aesthetic and ergonomic office chair

By 'carving out' particular shapes on the back inner, the chair back itself becomes flexible. After trying and comparing over 10 different patterns, we finally select this long round shape carving pattern. It's a balance of softness and support.

The chair back bends under pressure, especially the middle area of the back always offer your back bone supports, no matter you are working or stretching.

Inner And Outer Back Separation Design.

Based on minimalist design concepts, fiesta chair used the separation of inner and outer back and hollow back design to highlight the sense of line, while providing a strong guarantee of safety.

Rounded edges, a soft back that moves with the body, and a powerful seat mechanism provide a comfortable and first-class sitting experience.

Simple Move Freely

Slim Back Design

REFREEDOM

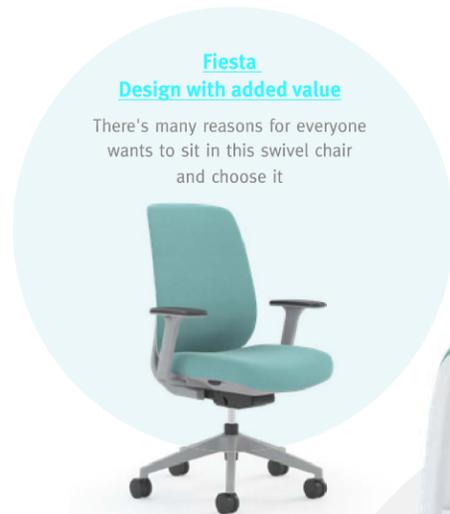

Team work requires freedom of movement

Due to the separated design of the chair back inner and outer, it allows the back inner becomes very slim which makes it look very light and vigorous.
