

WORK STATION

INVENTO

# INVENTO

It is an INVENTO series that proposes different types of layouts in line with changing office furniture trends. Introducing a new concept of workstations in configurations that meet the needs of members, from collaboration on a large scale.

## WORK STATION

## Homelike Office

Sensuous design with integrated desk, storage, and panel connectivity. Harmonious blend of space. The stylish combination of Two-tone's mélange fabric, wood and steel creates a warm and modern home office.

## INVENTO

### A MOBILE DESK

The independent desk wiring system makes it easy to navigate. The wiring function under the desk allows for a variety of layouts with a free power connection.

### CUSTOMIZING MOBILE DRAWER

There are upper spaces and drawers that can load bags, so space utilization is better than existing drawers. The drawer side offers the option to store bags, umbrellas, and slippers etc, so you can choose to suit your convenience.

## WORK STATION

### LOOP-SHAPED DESIGN LEGS

Complete with a smooth curve, the loop leg design creates a warm and comfortable home and office space.

### SAFE AND CONVENIENT SLIDE DOOR SOCKET

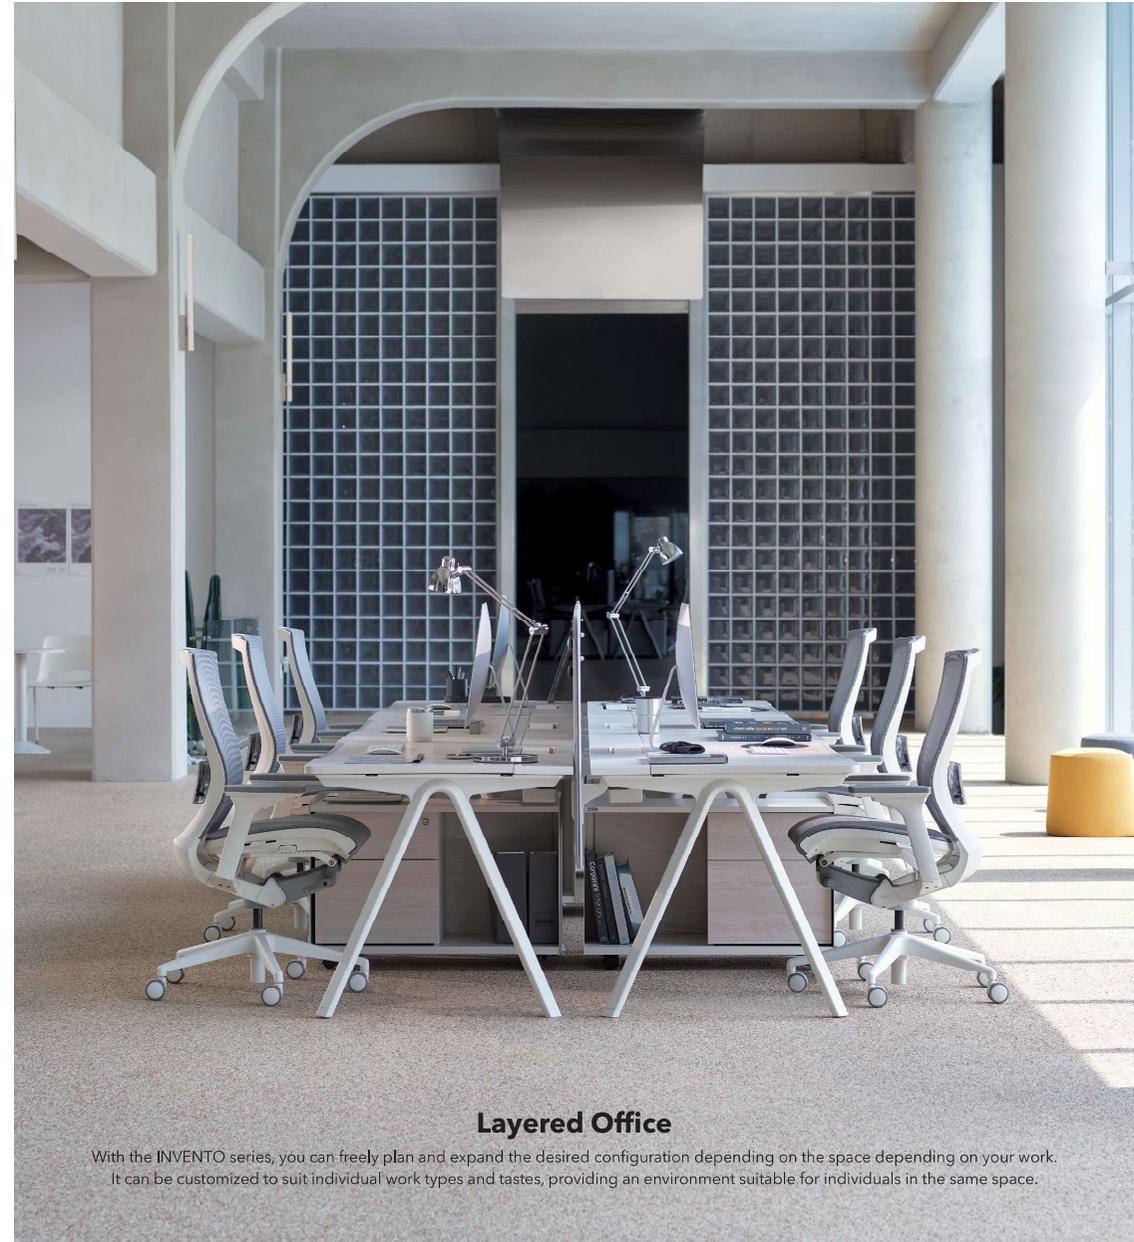

Even with a monitor stand, a slide-opening door can be conveniently opened and closed with one-touch. The damper can be applied to prevent injury to the fingers and to use it safely.

### STORAGE AVAILABLE AS A SECONDARY DESK

It's great for supporting desk and storage for personal business as well as tables for simple meetings.

## INVENTO

### Layered Office

With the INVENTO series, you can freely plan and expand the desired configuration depending on the space depending on your work. It can be customized to suit individual work types and tastes, providing an environment suitable for individuals in the same space.

## WORK STATION

### Customizing storage

Modular system furniture is practical because storage can be configured according to the type of work and storage scale. The basic configuration, removable storage tray, can be customized, making it easy to move and install according to personal taste and purpose.

## INVENTO

### Easy to connect

The slim invento panel is lightweight and one-touch assembly structure, making it easy for anyone to install and move in the space they need. The panel frame, which is connected to the two-tone's mélange fabric, creates a space with minimal sensitivity.

### Collaboration

Improve work efficiency and support a creative work environment with a layout that enables simple conversations or meetings during work. Sidecars can be used as a space for communication if they are attached and placed when simple consultations are needed as well as storage.
