

the ONE platform

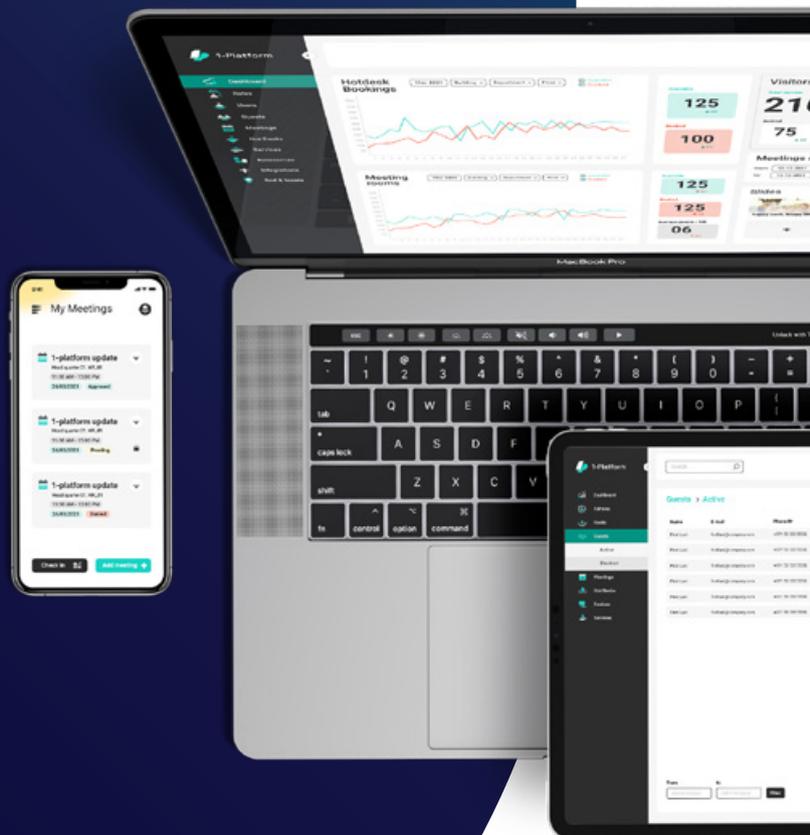

Overview

1-PLATFORM IS A MARKET LEADING SOLUTION TRANSFORMING EVERYDAY OFFICE PROCESSES INTO A SMART WORKING ENVIRONMENT.

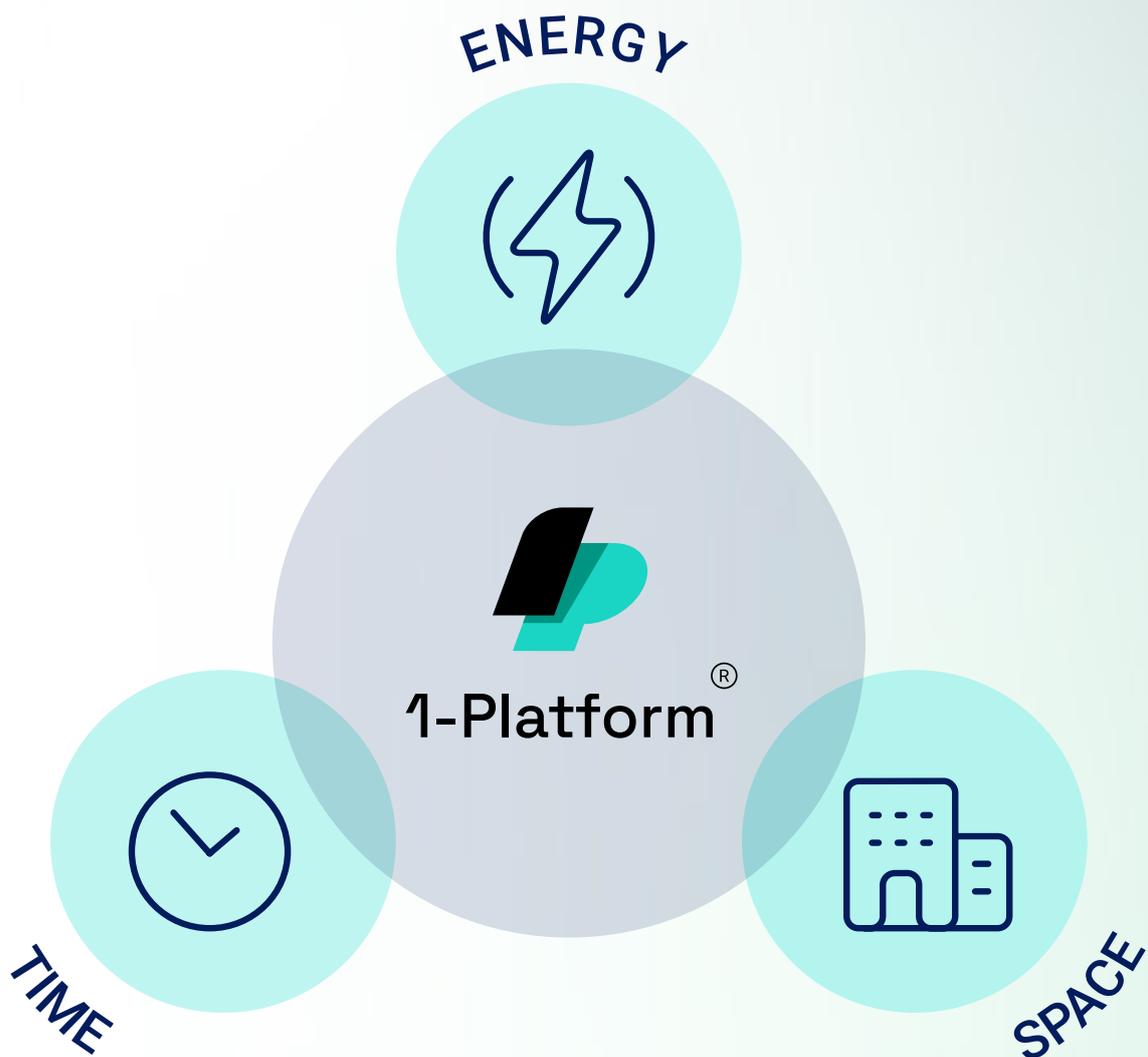

With user experience the primary focus we bring all your work applications into one place, We Address Business Challenges on a flexible, fully automated integrated digital experience across various business areas, to enhance data sharing ,increase Productivity, save space, time and Energy.

AI-powered platform, empowering all businesses to become software powered with 1 UI.

1-Platform is a human-centric workplace management platform that helps businesses optimize their spaces, time, and energy. With its advanced UX/UI, it simplifies meeting room booking, collaboration, and task delegation, improving productivity and time management. Whether remote or on-site, 1-Platform ensures seamless communication and real-time tracking to daily workplace habits.

Our platform merges space, time, and energy for optimized productivity.

Why 1-platform?

Our vision is to make the greener planet lives more efficient and sustainable and user-friendly. Here comes 1-Platform. Our technology has revolutionized the way we live and work, and it offers many benefits that can save time, space, and energy. 1-Platform is a key enabler of digital transformation, which refers to the integration of digital technology into all areas of a business. We contribute to sustainability efforts by enabling energy efficiency, waste reduction, and resource optimization

Digital Transformation

1-Platform use IoT technologies to transform traditional business operations and models to be more digital and data-driven. Our system involves connecting devices and sensors to the internet to collect and analyze data, which can then be used to optimize and automate various processes. We automate the processes, perform data-driven decision-making, improve the customer experience, and create new business models which can help businesses to stay competitive and adapt to the rapidly changing technological landscape by leveraging the power of data and automation.

Sustainability

1-Platform support sustainable practices and reduce the environmental impact of businesses and organizations. Our Smart energy management is used to monitor and manage energy usage in buildings and facilities, enabling businesses to identify and reduce waste and improve energy efficiency. Our sensors can be used to monitor air and water quality as well as allow businesses to reduce waste and optimize logistics to reduce their carbon footprint

User Experience

1-Platform is designed with simplicity and ease of use in mind. The interface is very intuitive and user-friendly, with clear instructions and feedback. It ensures reliability, prioritizes security, and protects user privacy. All Users have access to clear documentation of 1-Platform and customers should have access to support channels such as email, phone, or chat.

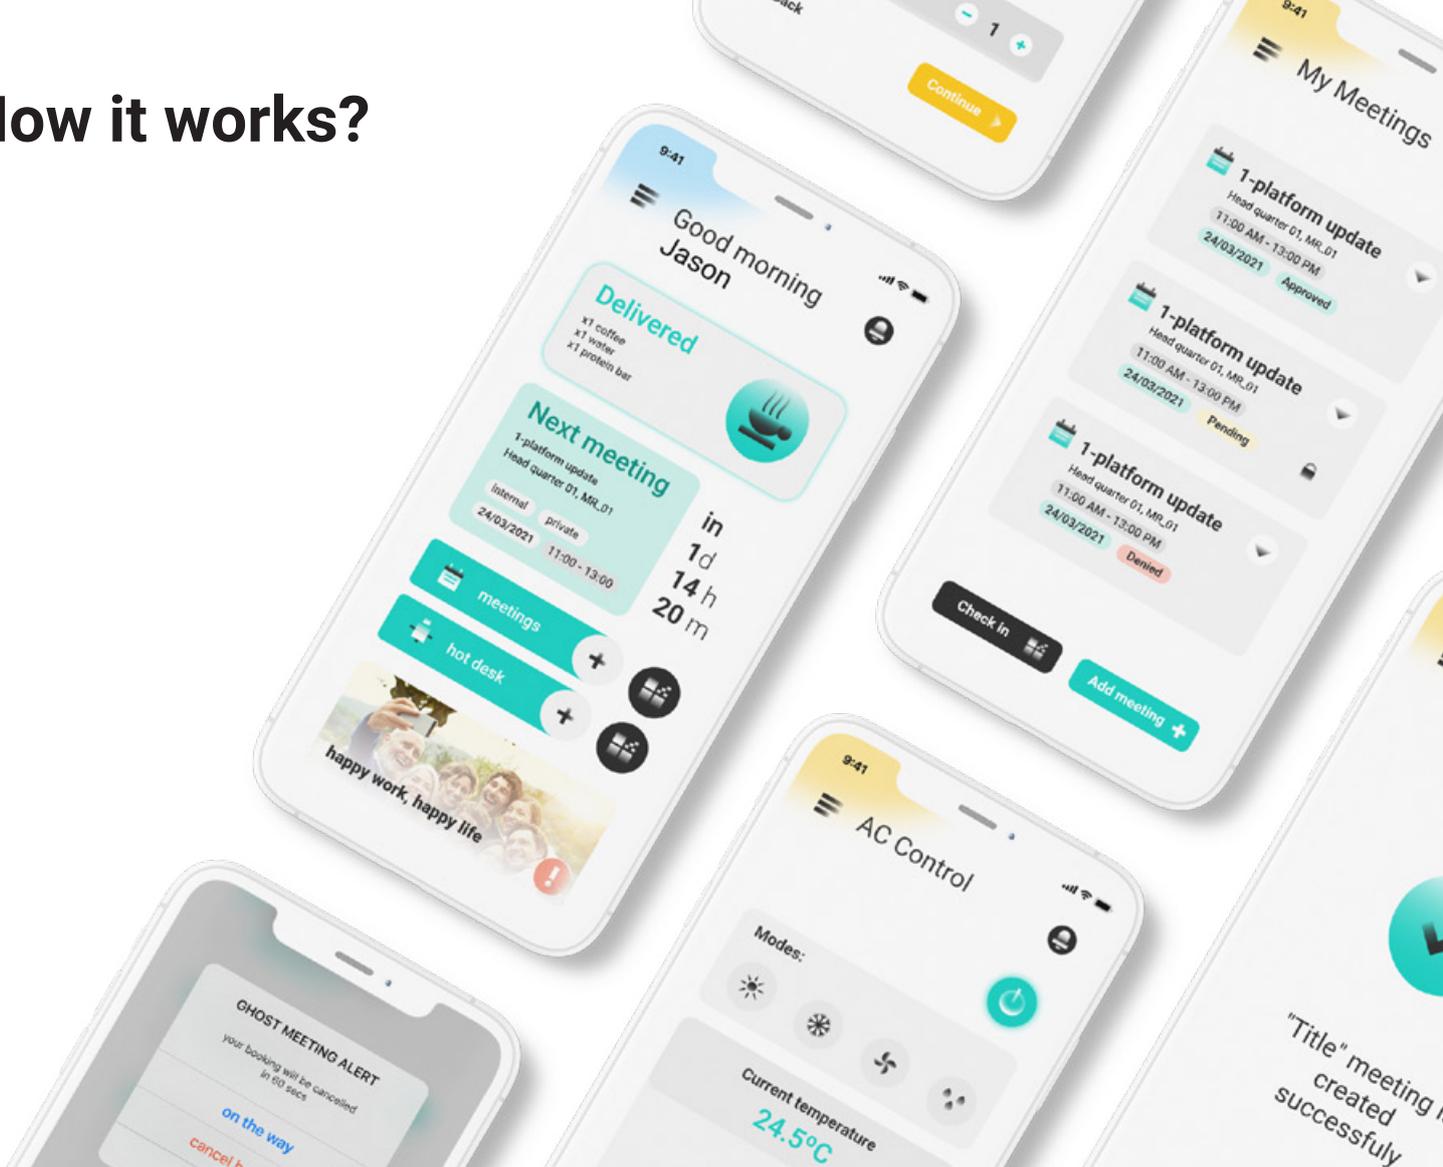

A modern office interior with wooden walls, exposed ceiling pipes, and people working at computers. The scene is dimly lit with a blue tint. In the foreground, a man in a blue shirt sits at a desk with a computer monitor. Other desks and people are visible in the background. The ceiling features large, silver, cylindrical ducts and wooden beams. The overall atmosphere is professional and tech-oriented.

**It is not
only about
technology**

**It is also people and
data centric.**

How it works?

Flexible

1-Platform is a flexible and user-friendly platform that can be accessed across Android, iOS, and the web. Its advanced UX/UI enables easy scheduling and resource allocation updates on-the-go, providing a seamless user experience across all devices.

Intelligent

1-Platform combines AI, ML, API, and NLP to automate tasks, optimize processes, and enhance user experience. The platform's technology enables accurate analysis, communication, and seamless integration with other software, improving productivity and sustainability in workplace management.

Complete

1-Platform offers on-premises or cloud deployment, giving users control over data and faster access speeds or flexible and scalable access. Users can choose the best deployment option to suit their business needs.

The Architecture

Choose from our pre-loaded modules or our talented team can build a custom solution for you.

We can integrate with most modern hardware through the use of API's and Drivers enabling us to communicate effectively.

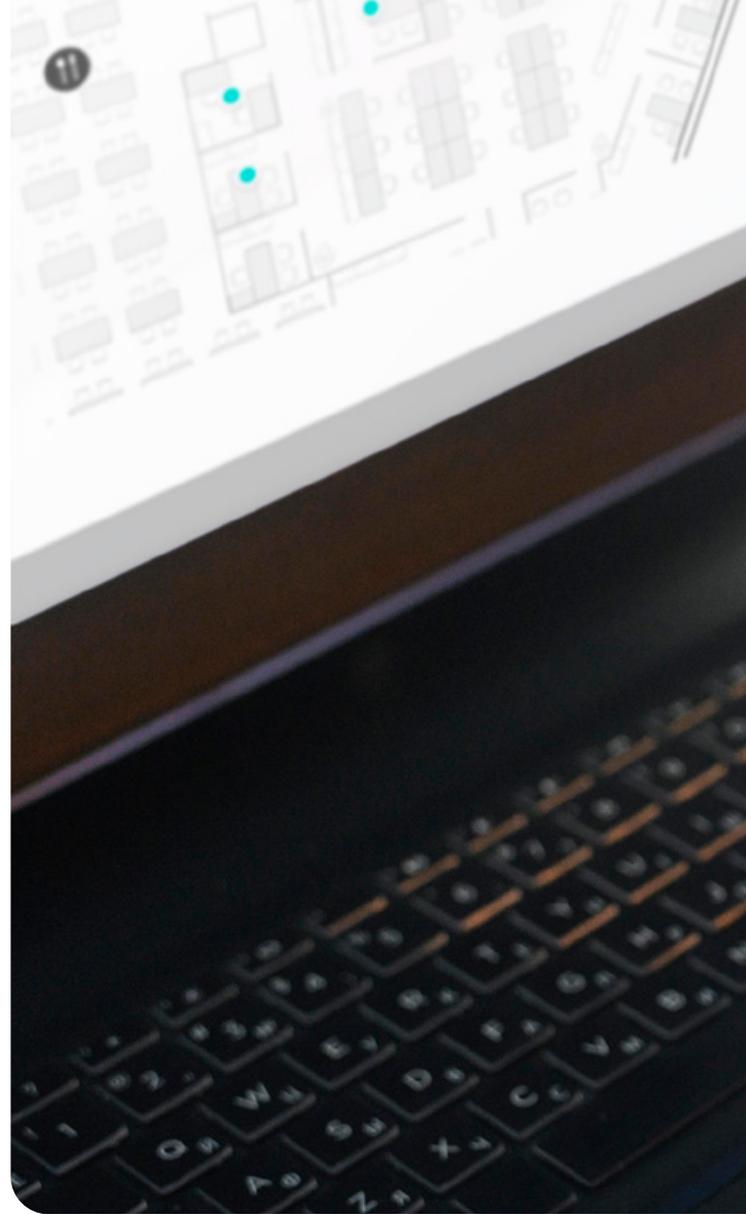

Pre-loaded and ready to go

Modules

WE COMBINED THE BEST FEATURES AND MODULES TO ENSURE PRODUCTIVITY AND BETTER USER EXPERIENCE

1-Platform provides a range of modules, including booking, ticketing, analytics, energy, and domestic controls. These modules enable businesses to streamline their processes, analyze their data, control energy usage, making it an essential tool for companies looking to optimize their operations and reduce their environmental impact.

Booking

- Hotdesk booking
- Meeting room booking
- Parking booking
- VIP / Private resources
- Pantry ordering

Analytical

- Dashboard
- Monthly report
- Statistics

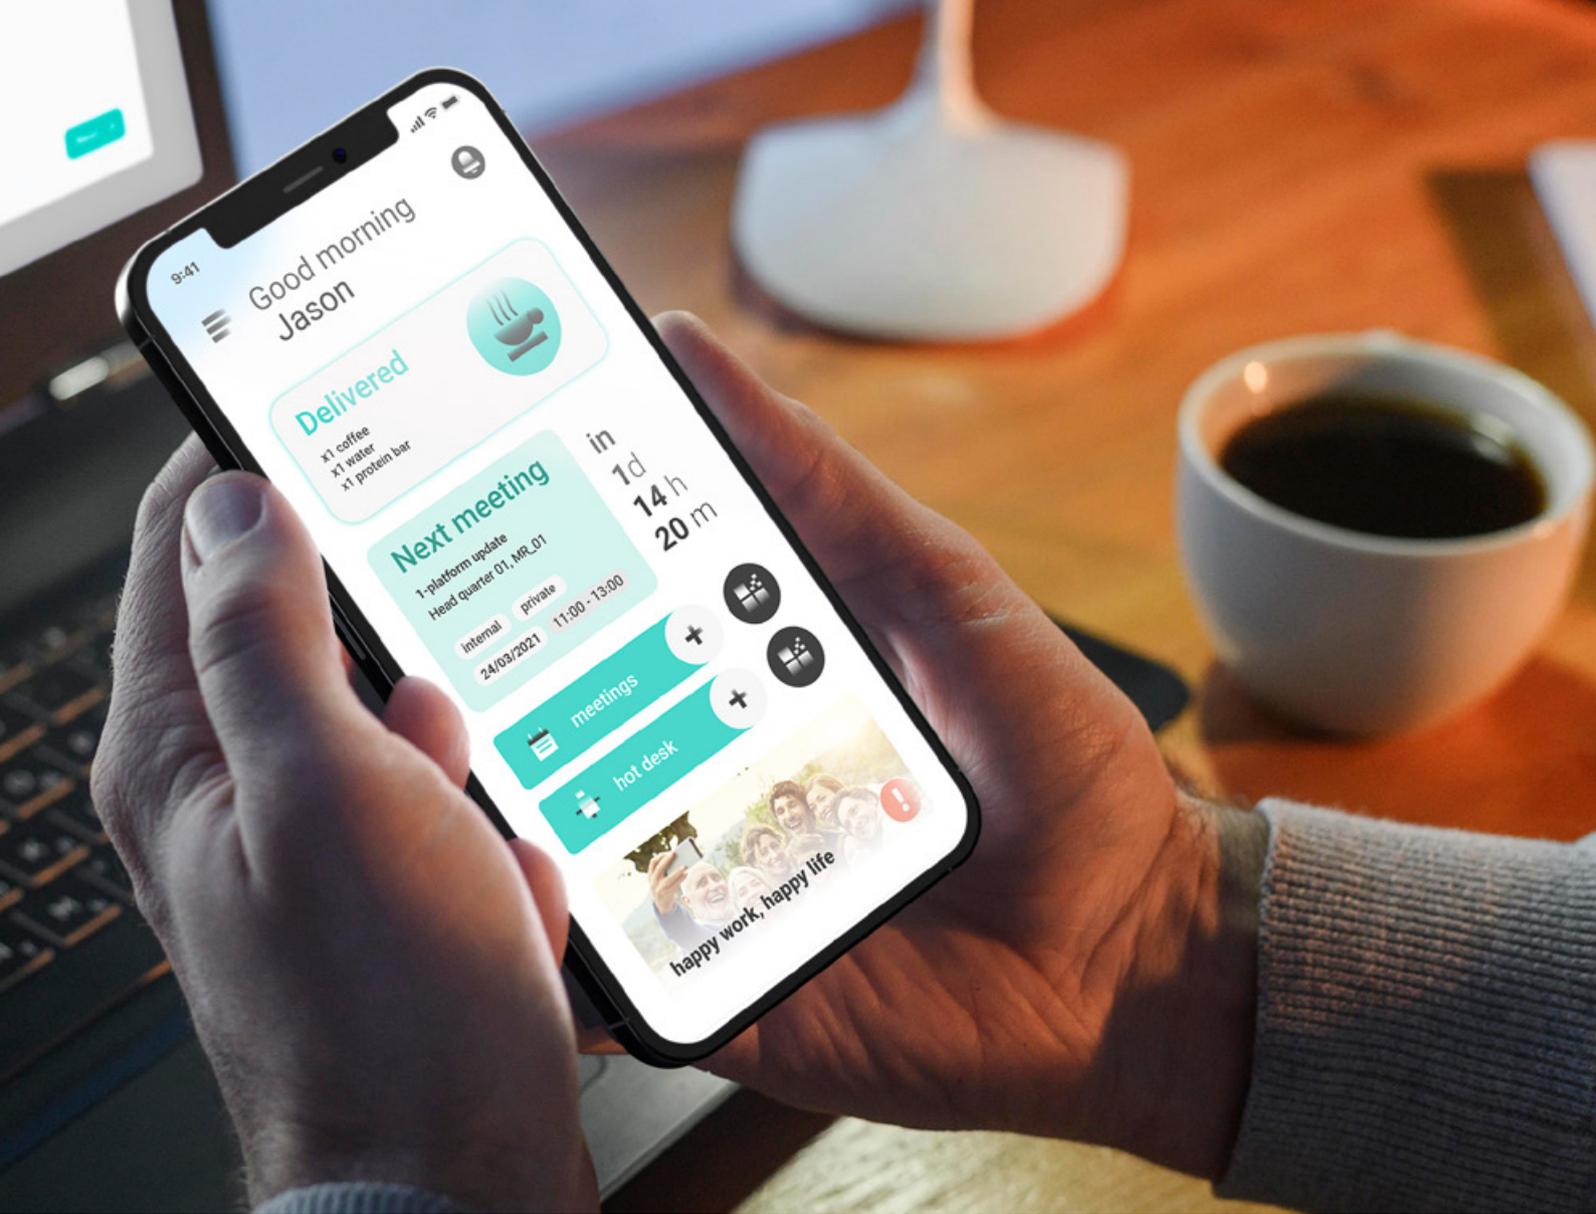

Ticketing

- Housekeeping
- Maintenance
- Technical support
- Task delegation
- Ticketing management

Controls

- Audio / Video
- AC
- Curtains
- Lights
- Area controls

Energy

Energy monitoring
Energy optimization
Energy dashboard

Visitors

Visitors management
Digital Access codes
Way-finding
Delivery

Security

Alerts & violations
Access control

Hassle-Free meeting room management

1-Platform's Meeting Room Management helps you get more from the available space, saves you time, and improves your employee and visitor experience. It helps in

Avoid scheduling conflicts and double booking.

Avoid Ghost bookings by sending a real-time trigger to the system to update the room.

Call transfers between meeting rooms.

Room Suggestions based on capacity, amenities and convenience.

Save time with easy network management tools.

Guide visitors and staff to their destinations.

Put hosts in control of screens in meeting rooms.

Hot Desk Management

From cost savings to a better work environment, 1-Platform's Desk Management improves your office with smart solutions.

Improve Space Utilization by Optimizing your office space with smart tools, and discover how you can facilitate more people in the same space

Get the Occupancy Insights and the usage of desks and meeting rooms at your office, and set up your office accordingly

Helps in Increase productivity and lets employees book a workspace that fits their needs for the day, and help increase their creativity simultaneously

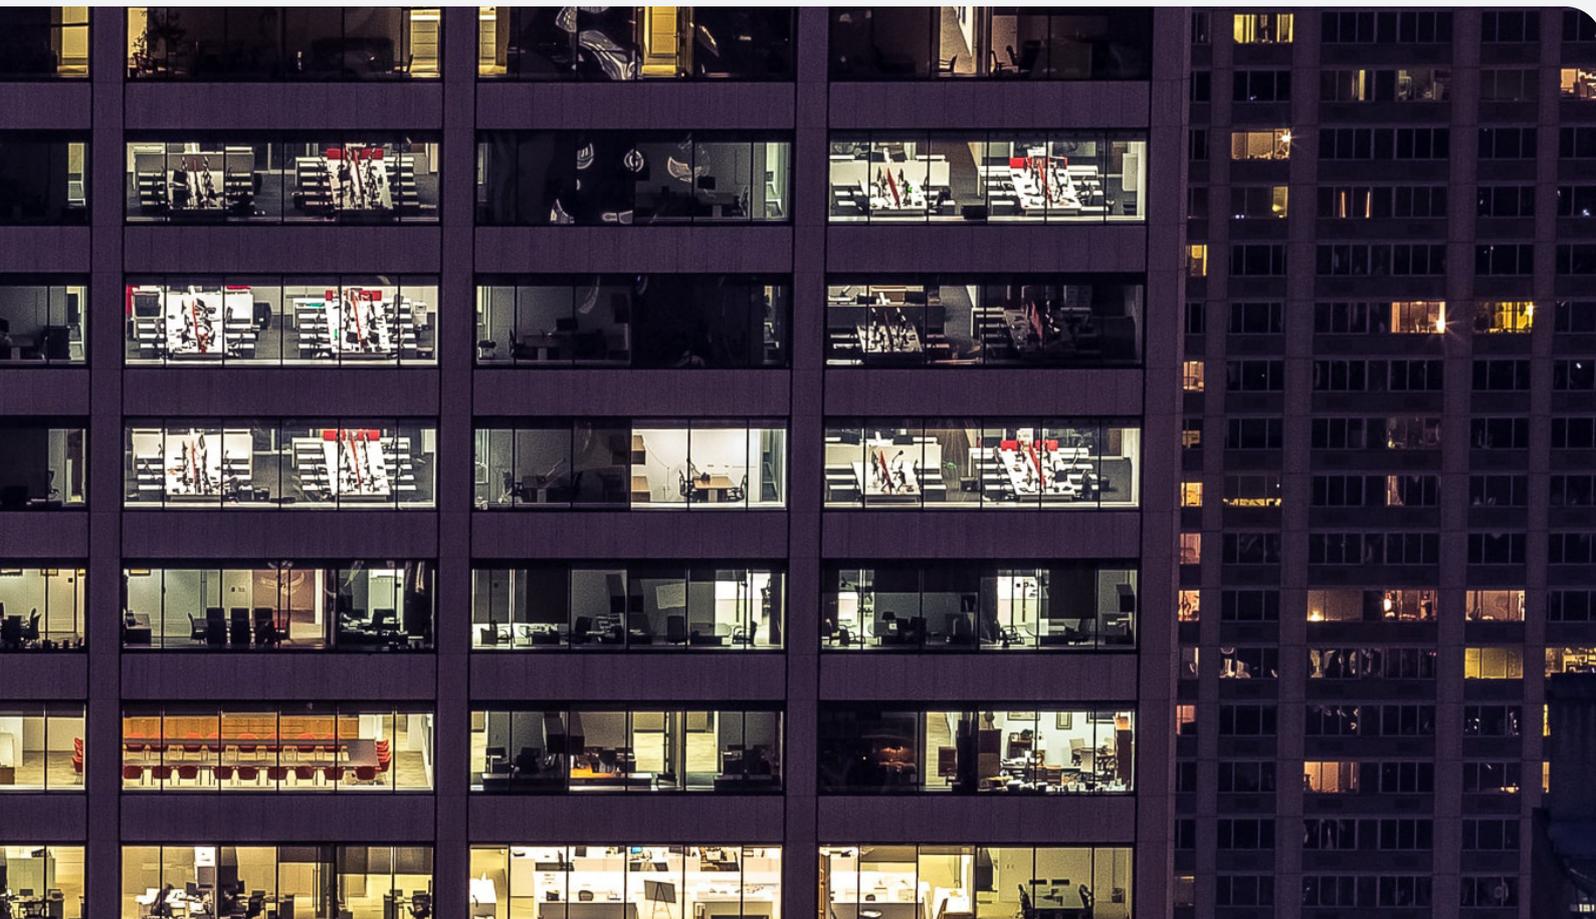

Match their needs - With smart tools, employees choose a workspace that is equipped with the hardware they prefer and need.

Avoid Ghost Bookings - Sensors detect when a meeting room isn't being used, sending a real-time trigger to the system to update the room

Book anywhere - Book workspaces through a mobile app or on your computer desktop, all bookings are made visible real-time

Access Control to Special Areas

1-Platform's access control systems prevent access to special areas without prior approval. It informs, prevents, detects, and reacts to such actions very proactively.

1. Inform

Inform the employees/admin about the measurements you're taking, and let him know where the violation occurred.

2. Prevent

Optimize the office space that you have with rules and regulations in mind, and prevent exposing employees to unnecessary risks.

3. Detect

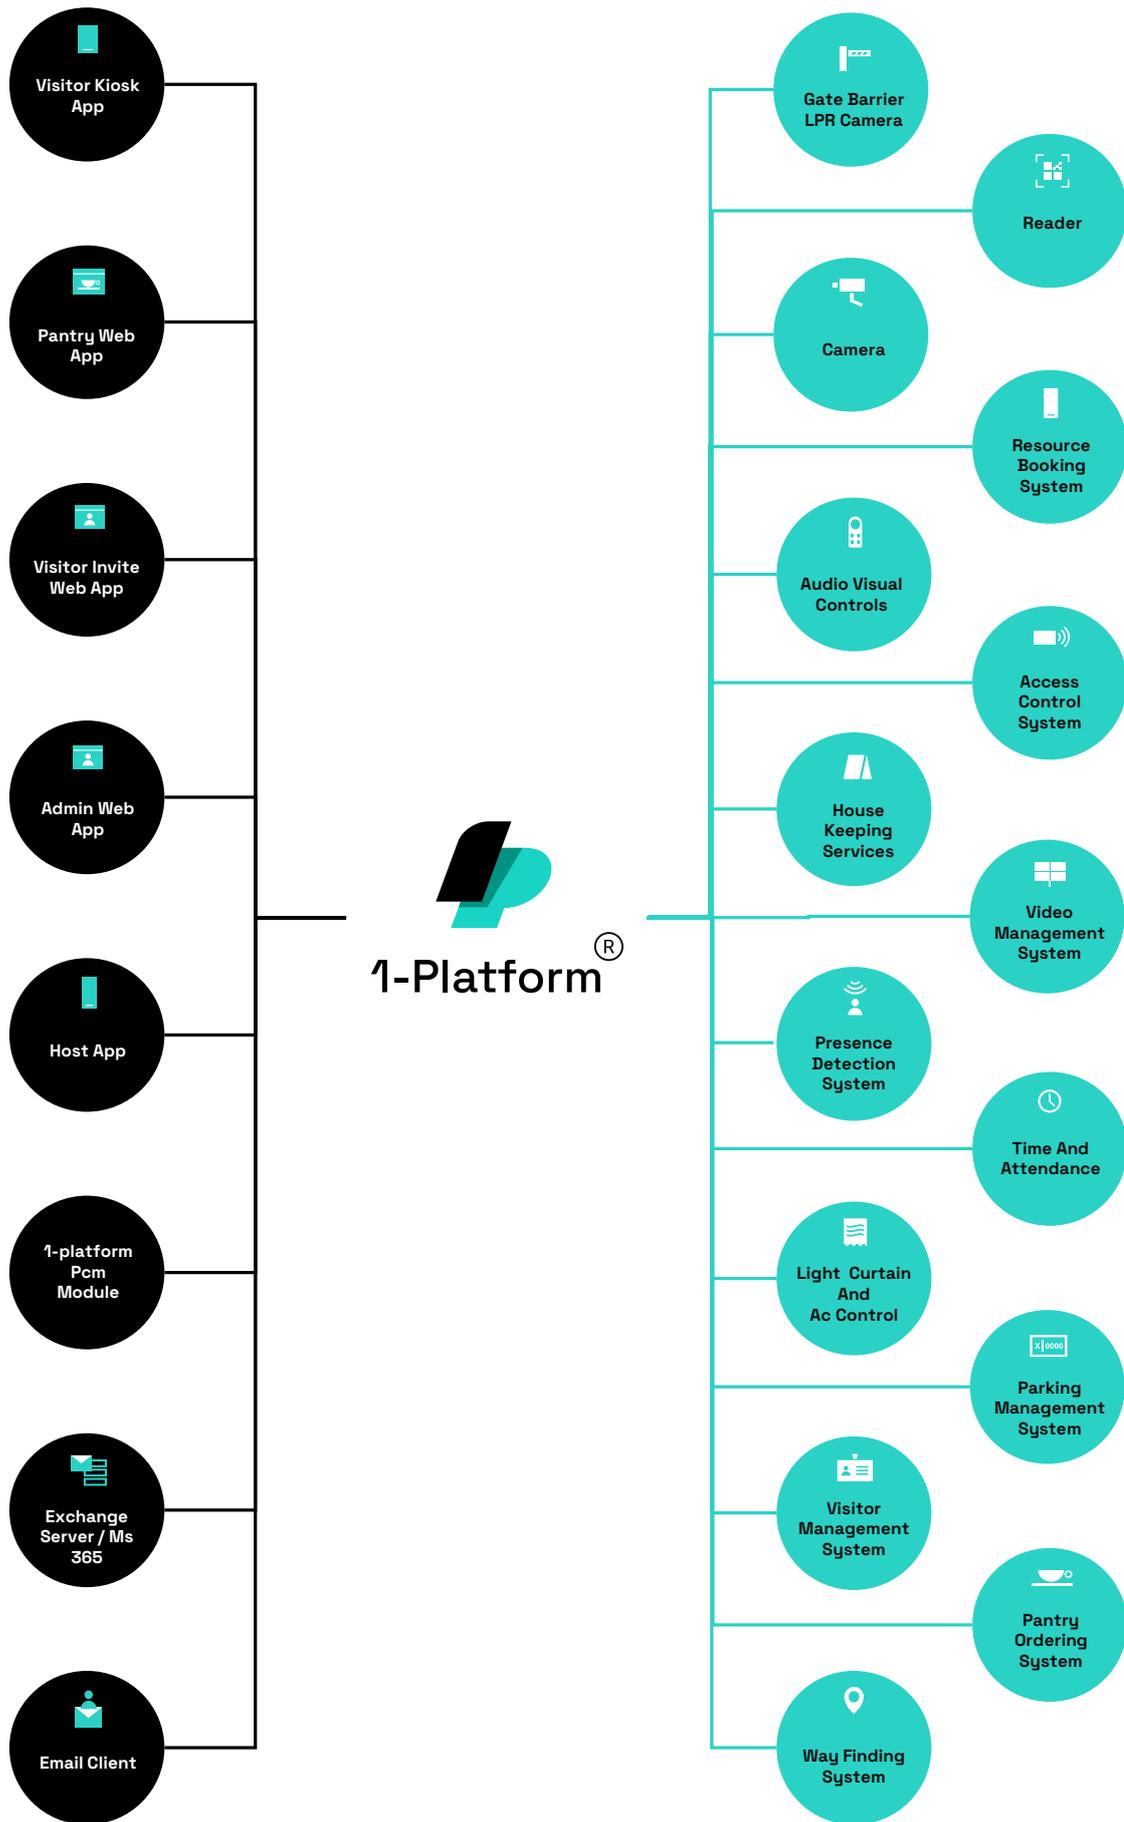

Keep a watchful eye on new technologies and detect alarming conditions in an instant to protect your visitors and employees.

4. React

Immediately respond to breaches and react to abnormalities with your digital signage network, keeping your surroundings safe.

Features

Auto Check-In

1-Platform's Auto-check-in enabled to use of devices such as sensors and beacons to automatically detect when a customer arrives at a location and check them in without the need for manual intervention. Our analytics tools help you to analyze the data collected from the IoT sensors and the app to gain insights into customer behavior and improve the auto-check-in process.

On-Demand Energy

1-Platform use connected devices and data analytics to monitor energy usage, optimize energy efficiency, and automate energy-saving processes. Our energy management systems can automatically turn off unused equipment, adjust lighting and temperature settings, and optimize energy usage based on occupancy and usage patterns. Organizations can reduce energy consumption, lower energy costs, and improve sustainability by implementing these strategies.

Microsoft Teams Call Management

Have you ever encountered directly performing a Microsoft Teams call transfer using one device to another when a meeting going on. 1-Platform's automated call routing and other tasks it is possible to integrate IoT devices with Microsoft Teams and manage calls. We use Presence Detection and Proximity Detection which helps, when a user enters the room, the sensor can trigger an action to transfer the call to the room's audio device.

Indoor Navigation

1-Platform's smart indoor navigation provides users with real-time information about their location and directions within a building or other indoor space which involves using a combination of sensors, beacons, and mobile apps. Our users can navigate complex indoor spaces with ease, improving their experience and reducing frustration. In addition businesses and organizations can use the data collected from the system to gain insights into user behavior and optimize their operations.

People Counting

1-Platform accurately count the number of people entering and exiting a building or other enclosed space. Businesses and organizations can gain valuable insights into the number of people entering and exiting their premises, enabling them to optimize their operations, enhance customer service, and improve security. In addition, 1-Platform's people counting can be used to monitor crowd density and ensure compliance with social distancing and occupancy limits.

Periodic Reports

1-Platform derive actionable insights from the vast amounts of data generated from your on-premise devices. We have a bunch of reporting tools available ranging from simple spreadsheet software to more advanced analytics platforms which represent the temperature, humidity, location, vibration, and other metrics. We have a user-friendly dashboard that presents the data in a meaningful way. We use charts, graphs, and other visualizations to help users understand the data and identify trends and anomalies and ensure that the dashboard can be customized to meet the needs of different users.

Single Sign-on

1-Platform's centralized authentication system allows users to access multiple applications or services without having to enter their login credentials each time. Our solution supports Microsoft 365, OAuth 2.0, OpenID Connect, and SAML to meet your security requirements. Our simplified authentication process reduces the risk of password-related security breaches and also uses strong encryption and access controls to protect user data.

Pantry Management

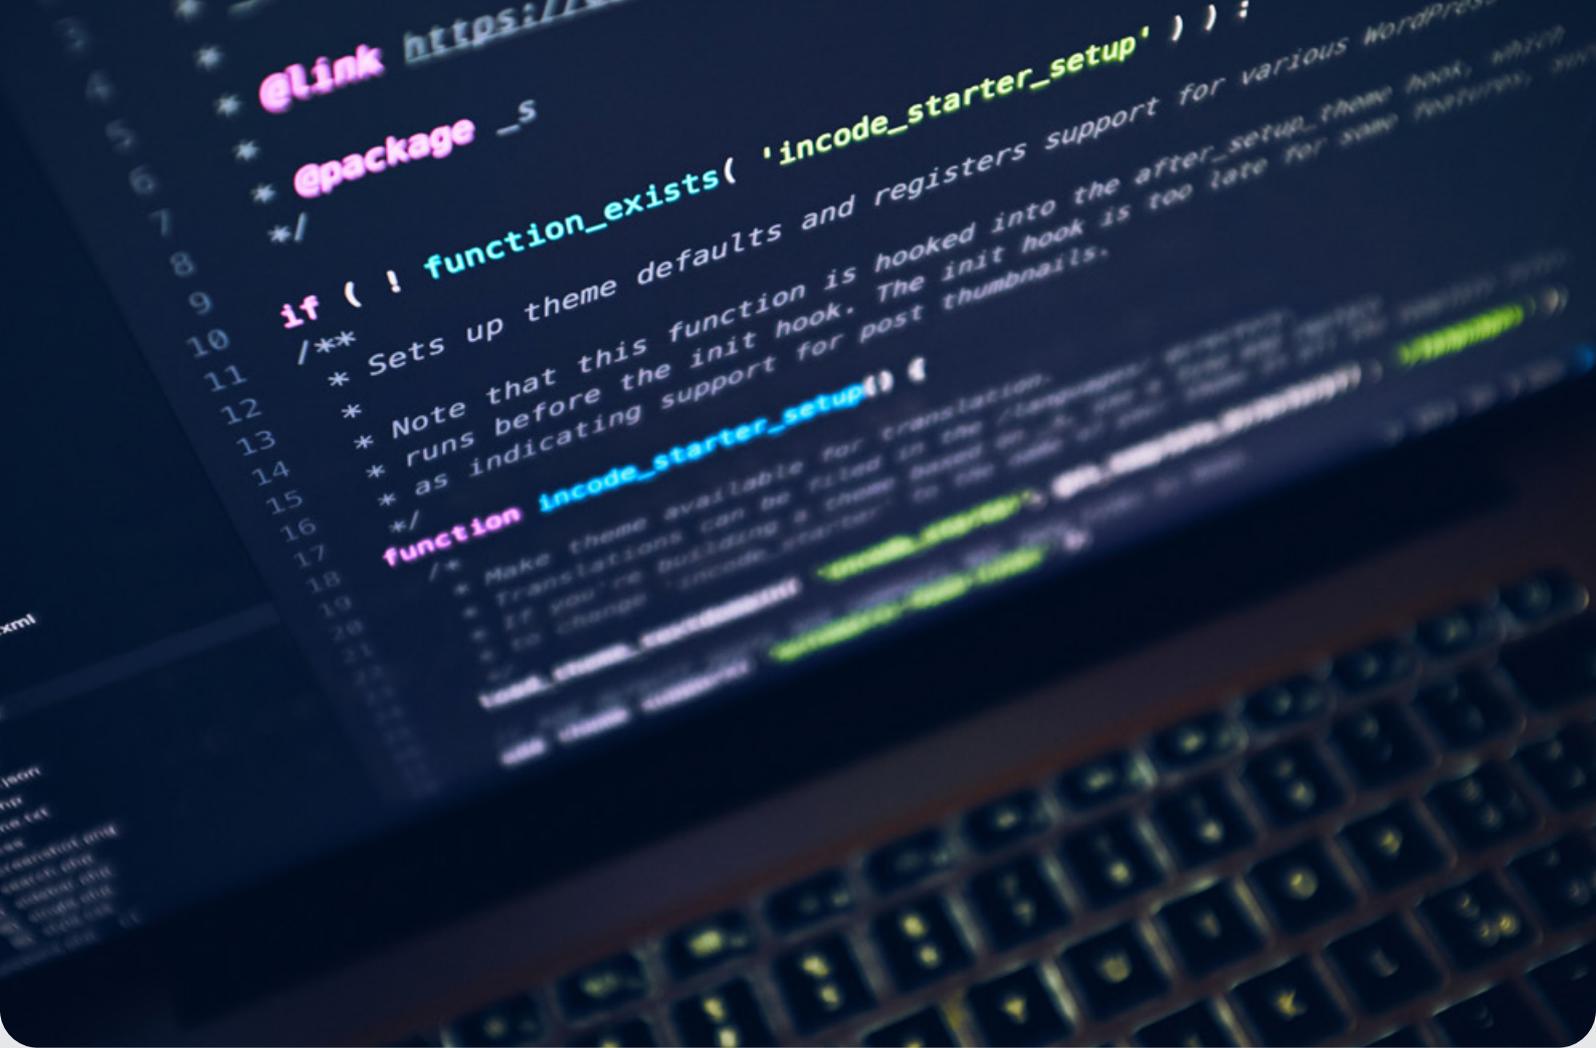

1-Platform's super-inclusive pantry management system has a combination of sensors, automation systems, and data analytics to monitor inventory levels, track usage patterns, and automate restocking and ordering processes. By using our solution organizations can improve inventory management processes, reduce waste and inefficiencies, and enhance the overall pantry experience for users. We send real-time orders to the pantry from ongoing meetings with reminders and frequent lists.

Intelligent ID

1-Platform use advanced technologies, such as biometrics, machine learning, and artificial intelligence (AI), to enhance the accuracy, efficiency, and security of identity verification. Our Intelligent ID systems are designed to make identity verification faster, easier, and more reliable while reducing the risk of fraud.

We deliver results

no matter the
industry we have a
tailored solution for
you.

Integrations

WE PROVIDE THE VALUE OF A SEAMLESS AUTOMATION THROUGH UNLIMITED INTEGRATION

1-Platform works with new and existing hardware

A major advantage is that we can work with your existing modern office system. Our team can create the code that is needed to communicate with your system.

Seamless Integration

All Hardware Compatible

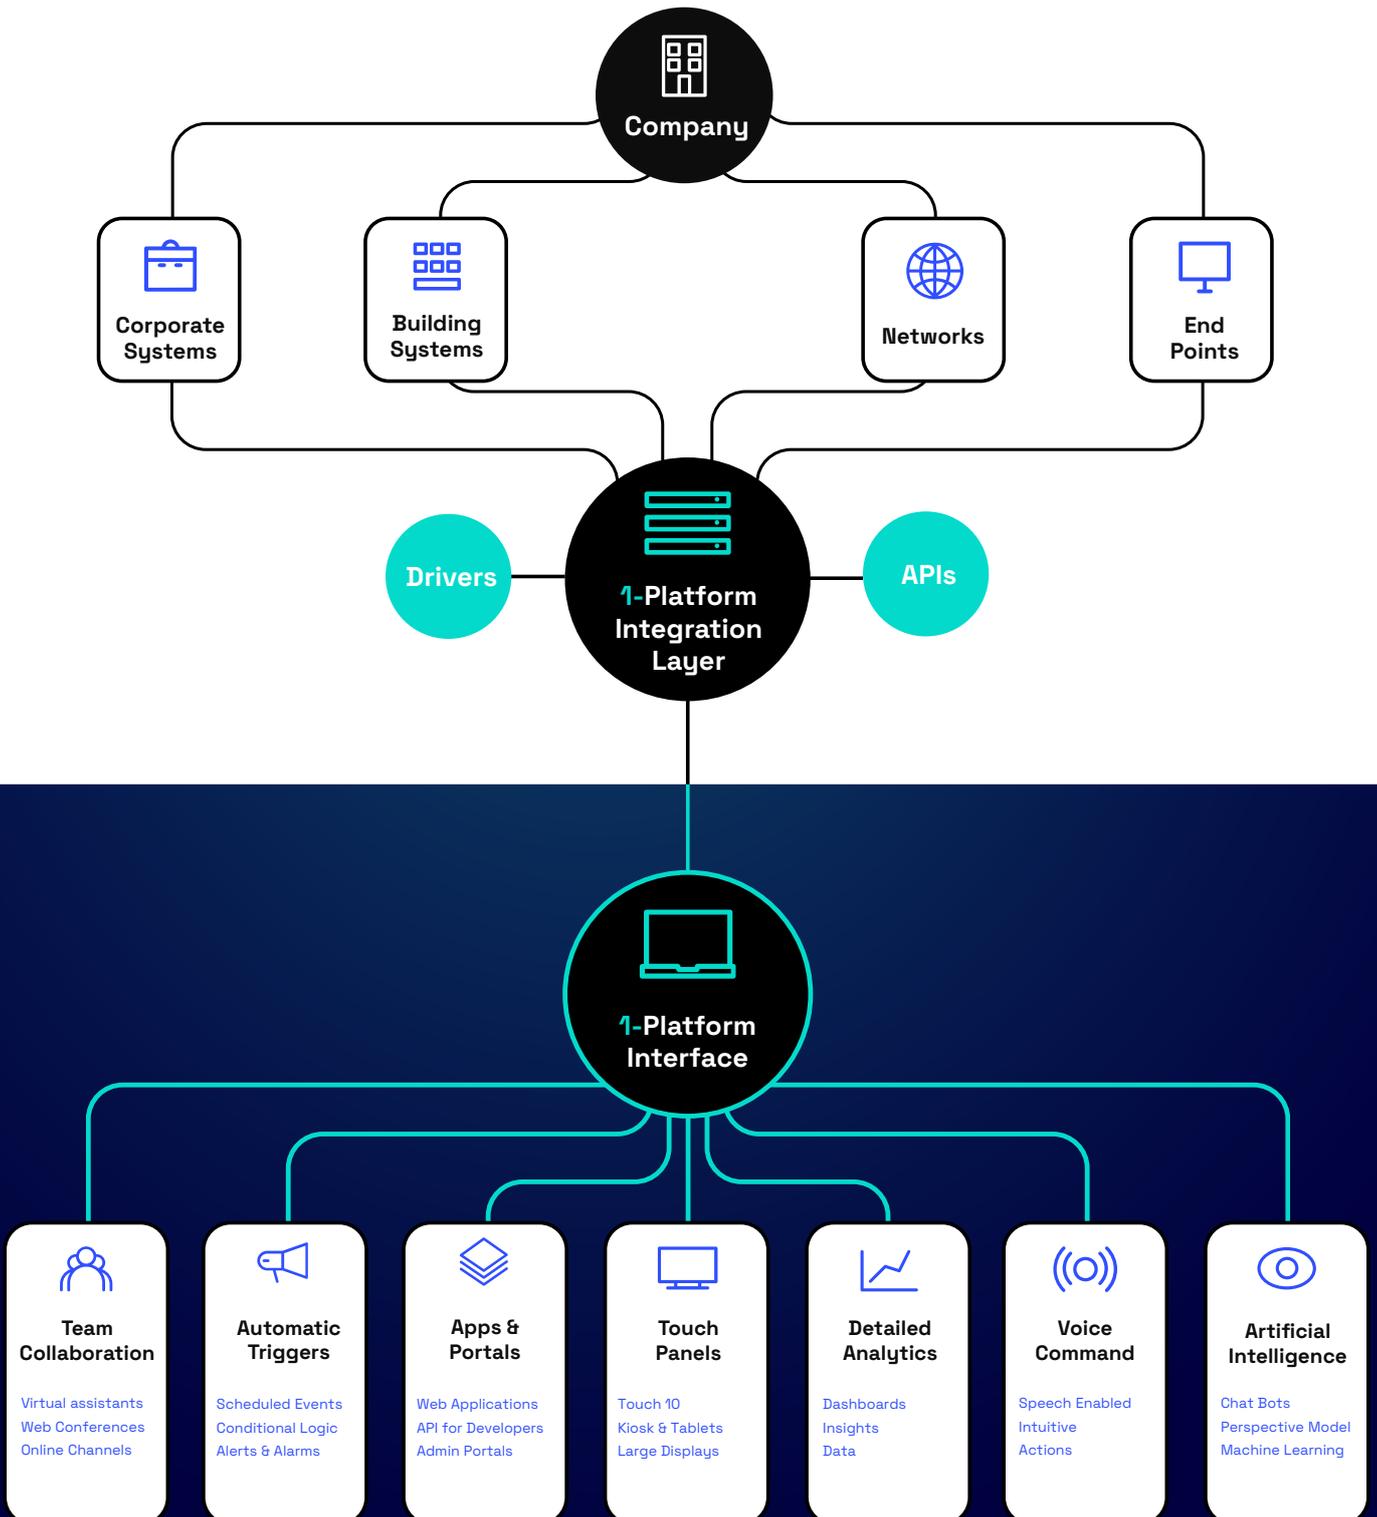

Technology Agnostic

All Your Apps in 1 Place

1-Platform Integrate ,control & automate your business environment and Define a real-time trigger actions to automate your workflows.

The framework

WE ARE MORE INTEGRATED, MORE AUTOMATED TO OPTIMIZE USER EXPERIENCES

Deployment

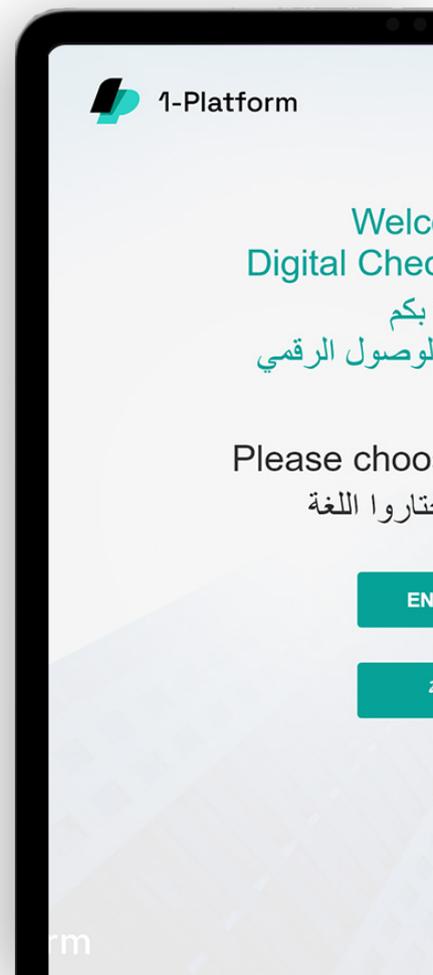

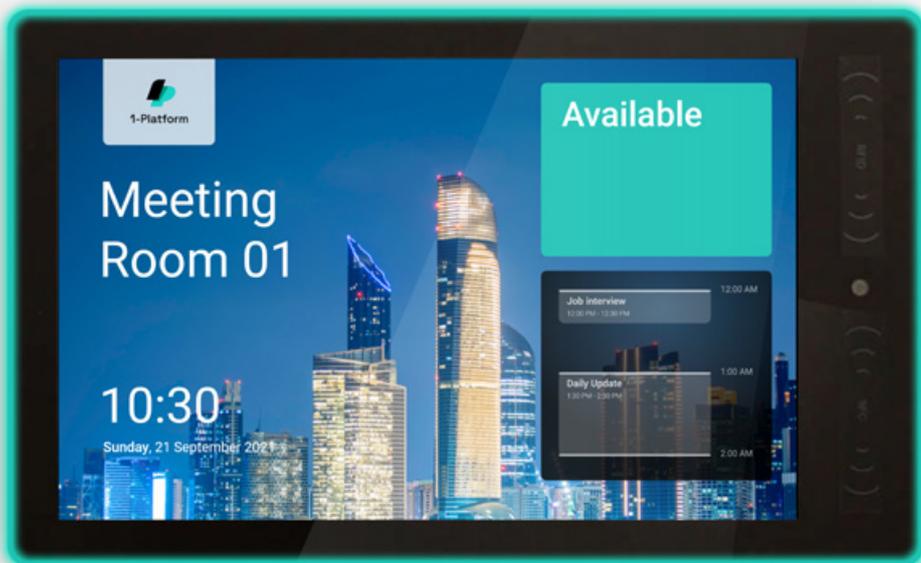

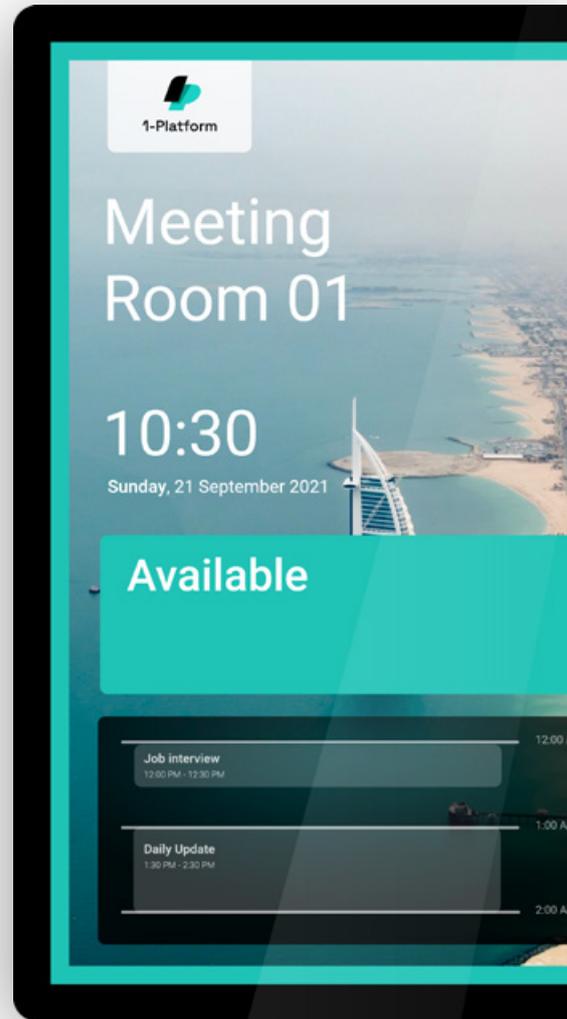

New and existing hardware and software

1-Platform is a versatile platform that is compatible with both new and existing hardware and systems. This means that businesses do not have to purchase new equipment to use the platform. Additionally, the platform integrates seamlessly with existing systems, allowing for a smooth transition and minimal disruption to daily operations. 1-Platform's compatibility with different hardware and systems make it an accessible solution for a wide range of businesses.

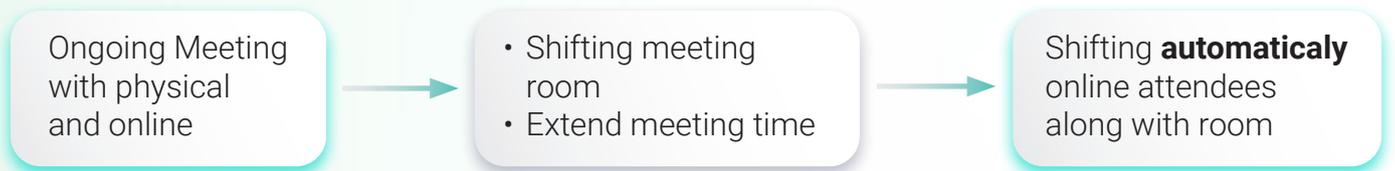

On-premises and Cloud

1-Platform empowers its users with the freedom to choose their preferred mode of deployment, be it on-premises or on the cloud. This flexibility allows businesses to tailor the platform to their unique needs, making it an ideal tool for digital transformation. Whether you prefer the control and speed of an on-premises deployment or the flexibility and scalability of the cloud, 1-Platform has got you covered. So why limit yourself? With 1-Platform, explore the infinite possibilities of a dynamic workspace.
